

Data Visualization by Dr. T. J. J.

PAGE NO. 1
DATE 10/10/2020

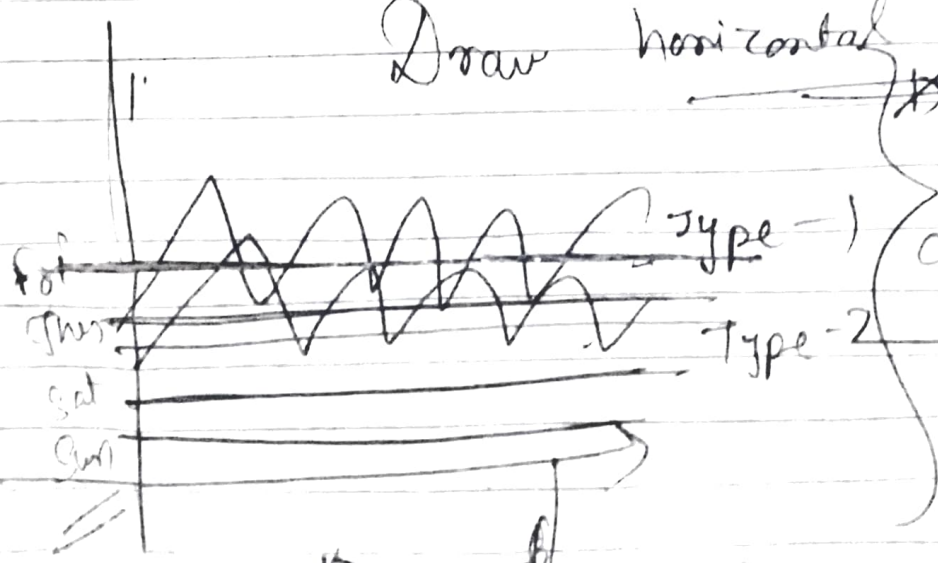

Interpret :-

1. There are more married males than females.
($19 = 10 + 9$, $11 = 28 + 43$)
2. Number of married females are greater than number of singles.
3. On the other hand, number of married males are less than single males.
4. There are no females having other marital status.

There are 40% married males & 55% married females in our data.

* We are playing with categorical values.
